

WL ROD ALMG 5

Main applications:

- All types of repairs.
- Chemical and pharmaceutical industries.
- Automotive applications.
- Aluminium and aluminium alloys with up to 5% Mg.
- High resistance to marine corrosion.

Classification

AWS A 5.10: R 5356

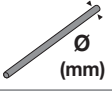

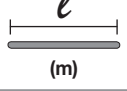

2012-554

MECHANICAL CHARACTERISTICS OF THE ALL WELD METAL (according to EN ISO 18273):

Shielding Gas	Tensile Strength (MPa)	Yield Strength (MPa)	Elongation A 5 (%)
Ar	≥ 240	≥ 110	≥ 17

ORDERING INFORMATION: rods 1 m length packed in tubes of 5 kg
